

## Hygienic

Totally non-porous, easy to clean with warm water and a cloth, stain proof and resistant against acids and solvents.

## Resistant to heat

Unalterable at high temperatures, non-flammable and insensitive to UV rays.

## Scratchproof

Very hard, highly scratchproof and resistant to abrasions.

## Natural

Manufactured respecting the environment and protecting consumers, free of petroleum-derived products and resins with antibacterial properties.

seven finishes for a countless amount of applications

### Fossil

A coarser textured surface finish, with a "roughness" similar to the split face or flamed surface of natural stone.

### Arena

A smooth and sand-like finish with a regular grain that confers a natural dynamism to the entire slab.

### Lithos

A fine rough surface, ideal for kitchen worktops, exterior paving of yachts and swimming pools.

### Dune

It recalls the sand of the desert, where the wind gently molds the landscape.

### Vesuvio

A fine textured, tactile but smooth surface - similar to a leather finish on a fine grained granite.

### Satin

Soft matte finish with a silky texture and low sheen that is extremely easy to maintain.

### Lux

A highly reflective polished finish that naturally enhances luminosity.

## Innovation & Design

without  
boundaries

## The perfect example of Italian style.

**Lapitec**<sup>®</sup> is a “full body” sintered stone entirely developed and produced in Italy. It combines great aesthetic appeal with advanced physical and mechanical properties.

**Lapitec**<sup>®</sup> is produced in XXL format slabs 3365x1500 mm. It is available in thicknesses of 12, 20 and 30 mm.
